About the Panel

The 2022 uprisings in Iran, sparked in the aftermath of the state murder of Jina (Mahsa) Amini, a 22-year-old Kurdish-Iranian woman, have ignited an ongoing country-wide and global movement against the intersectional inequalities in Iran. This panel focuses on multidimensional issues, including women's activism in Iran and how it is connected to the recent uprisings; the mainstream news coverage of the movement, feminist activists' use of digital media to call for solidarity, and the significance of feminist and solidarity approaches in journalism to produce more ethical coverage of the protests.
